Agile Space Industries

Agile Space Industries is a leading innovator in in-space chemical propulsion, specializing in hypergolic chemical systems including hydrazine monopropellant and MMH/MON3 bipropellant thrusters. Founded in 2013 and headquartered in Durango, Colorado, Agile has conducted over 8,000 hotfire tests and delivered propulsion systems for commercial LEO, lunar lander, and deep space missions. The company operates a vertically integrated facility covering design, additive manufacturing, integration, and testing enabling rapid development and delivery of new propulsion capabilities. AS9100D certified.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

Services

Engine Validation and Performance Data Agile validates flight hardware and provides reliable performance data using its adaptable test stands.	Hotfire Testing Services Agile provides hotfire testing for propulsion systems, utilizing its advanced data collection system and test stands.
Manufacturing Services Agile provides manufacturing services for propulsion components, utilizing both additive and subtractive manufacturing.	Propulsion Development and Qualification Agile develops and qualifies new propulsion capabilities quickly, adapting to specific mission criteria.

Product catalogue

AGILE SPACE INDUSTRIES

Zero Slosh Piston Tanks

The Zero Slosh Piston Tanks are designed to ensure over 99.75% propellant expulsion efficiency and prevent slosh during maneuvers, constructed with Aluminum and PTFE seals.

Expulsion Efficiency	over 99.75%
Construction Materials	Aluminum and PTFE seals
Manufacturing Time	under six months

price on request
