Boeing Defense, Space & Security

Boeing develops, manufactures, and services commercial airplanes, defense products, and space systems for customers in over 150 countries. The company's Defense, Space & Security unit offers products and capabilities including Autonomous and Unmanned Systems, Fighters and Bombers, Military Rotorcraft, Tankers and Transports, Patrol, Early Warning and Battle Management systems, Weapon Systems, and Space and Satellite Technology. Boeing Global Services provides service solutions for commercial, defense, and space customers, encompassing engineering, digital analytics, supply chain, and training support. The company's corporate offices are located near Washington, D.C. Boeing employs more than 182,000 people across the United States and in over 65 countries. Its business is organized into three units: Commercial Airplanes, Defense, Space & Security, and Global Services. The company's Commercial Airplanes unit manufactures commercial jetliners, with over 14,000 Boeing airplanes in the global fleet, including the 737 MAX, 777X, and 787 Dreamliner passenger airplanes, and freighters serving over 90% of the global air freight market.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES

Services

Crew and Cargo Recovery Operations Boeing conducts crew and cargo recovery operations for space missions, including solid ground landings for orbital capsules.	Maintenance, Repair and Overhaul (MRO) Boeing offers MRO services, including planned and unplanned maintenance and complex modifications, to enhance fleet performance and extend life cycles.
Mission Readiness Training Boeing provides comprehensive training solutions, including advanced curriculum, simulation tools, and virtual OEM expert support, for various aviation platforms.	Predictive and Prescriptive Analytics Boeing uses predictive and prescriptive analytics to optimize flight operations, boost warfighter readiness, maintain affordability, and reduce downtime.
Spacecraft and Launch Vehicle Assembly, Integration and Testing Boeing provides full assembly, integration, and testing services for spacecraft and launch vehicles, ensuring readiness for missions to low Earth orbit.
