Destinus

Destinus was built around a hard reality: modern defence is shaped by the age of mass-produced threats — no longer defined by a few exquisite platforms, but by scale enabled by intelligence and delivered at an industrial tempo. Destinus is a European defence manufacturer with a particular focus on scalable strike and air-defence systems for European and allied armed forces. Its strength lies in combining a unified autonomy stack, deep vertical integration, and industrial-scale production to turn fast iteration into operational capability. Key differentiators: vertically integrated European OEM control, AI-based modelling and software-centric development, continuous battlefield feedback loop, and scalable platforms with industrialised production.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

Product catalogue

DESTINUS

Hornet Block 2

The Hornet Block 2 is a dual-role interceptor and precision strike system designed for subsonic aerial threats, and maritime and ground targets.

Range	150+ km
Payload	3 kg

[price on request](#) [datasheet](#)

DESTINUS

Kryla

Kryla is a distributed saturation strike system designed for high-volume attacks, enabling coordinated multi-vector engagement and time-on-target synchronization to overwhelm air d

Payload	50 kg
Range	800+ km

[price on request](#) [datasheet](#)

DESTINUS

Ruta Block 1

The Ruta Block 1 is a first-generation baseline cruise system designed for precision strike against high-value military targets.

Range	300+ km
Payload	150 kg

[price on request](#) [datasheet](#)

DESTINUS

Ruta Block 2

Extended-range cruise system for precision strike against hardened and high-value targets at 700+ km.

Range	700+ km
Payload	250 kg
Guidance	E0/IR seeker with AI-assisted target recognition
Navigation	Low-altitude terrain-following, GNSS-denied capable
Launch	Booster-assisted salvo from 40 ft container

[price on request](#)

DESTINUS

Ruta Block 2

The Ruta Block 2 is a mid-layer extended-range cruise system designed for precision strike against hardened and high-value military targets.

Range	700+ km
Payload	250 kg

[price on request](#) [datasheet](#)

DESTINUS

Ruta Block 3

Long-range European deep-strike cruise system with in-house T220 turbojet propulsion at up to 2000 km range.

Range	up to 2000 km
Payload	250 kg
Propulsion	In-house T220 turbojet
Navigation	INS + GNSS + VNS + TERCON, GNSS-denied capable
Launch	Booster-assisted salvo from 40 ft container
Shaping	Low-observable
Technology	ITAR-free European stack

[price on request](#)

DESTINUS

Ruta Block 3

The Ruta Block 3 is a long-range cruise system designed for sovereign European deep strike capabilities, built around in-house T220 turbojet propulsion and an ITAR-free European te

Range	up to 2000 km
Payload	250 kg
Launch method	Container launch
