Gazprom Space Systems (GKS)

Gazprom Space Systems (GKS) is a daughter company of Gazprom that conducts space activities. It develops and operates telecommunication and geo-information systems for Gazprom Group companies and other customers. The company has created, operates, and develops the Yamal satellite communication and broadcasting system, and designs the aerospace monitoring system SMOTR. It provides telecommunication and geo-information services. Gazprom Space Systems is an international satellite operator, offering capacity in Russia, CIS, Europe, Middle East, Africa, South East Asia, and the Pacific Ocean. The Yamal satellite communication system includes an orbital satellite constellation (Yamal-202, Yamal-300K, Yamal-402, Yamal-401, Yamal-601) and a ground control complex, a telecommunication center and networks in Russian regions, and a satellite digital TV center for TV and radio broadcasting. Customers include governmental institutions, broadcasting companies, and Russian and international commercial service providers. Gazprom Space Systems is one of two Russian national satellite operators.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES

Services

Creating turnkey satellite communications and television networks

As an integrator, the company designs and implements complete satellite communication and television networks, primarily in the Russian market.

Geoinformation services

Utilizing its Aerospace Monitoring Center, Gazprom Space Systems provides geoinformation services to Gazprom Group companies and other clients.

Provision of satellite resource

Gazprom Space Systems sells access to its Yamal satellite capacity, primarily to large service providers with their own ground infrastructure.

Satellite telecommunication services

Leveraging its ground infrastructure, Gazprom Space Systems provides satellite telecommunication services to various sectors including state, corporate, and media companies.

Product catalogue

GAZPROM SPACE SYSTEMS (GKS)

Smotr Remote Sensing System

Satellite-based aerospace monitoring system for Earth observation and infrastructure surveillance, particularly of oil and gas assets.

Type	Satellite Earth Observation / Aerospace Monitoring
Primary use	Oil & gas infrastructure monitoring
Coverage	Russia and CIS region
Operator	Gazprom Space Systems
