Globalstar (C-3 next-gen)

Globalstar designs and manufactures satellite-based solutions for continuous connectivity, asset tracking, and communications. Their product lines include satellite IoT devices, embeddable satellite transmitters (chipsets), and SPOT Satellite Messengers. These solutions are utilized by government agencies, public safety departments, transportation carriers, maritime companies, and businesses in the energy, construction, commercial maritime, agriculture, and forestry sectors. The company provides technologies for command and control communications, near real-time information access, asset location reporting, fleet management, remote monitoring, and personnel safety. Their offerings support civil and military operations globally, enabling communication and tracking in areas beyond traditional cellular networks. They also offer the Realm Enablement Suite, an application enablement platform for telematics applications. Globalstar products provide global coverage.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES

Services

Customized Solution Development

Globalstar assists customers in developing streamlined and customized solutions to enhance efficiency and productivity in their field operations.

Data Management & Mapping Solution

A monthly or annual subscription service providing data management and mapping capabilities for Globalstar's satellite devices.

Realm Enablement Suite for AI-enabled applications

The Realm Enablement Suite is an application enablement platform that transforms data at the edge, reducing development time and satellite transmission costs, and provides tools to develop AI-enabled

Satellite IoT Device Monitoring and Tracking

Globalstar provides remote monitoring and near real-time tracking for businesses using Satellite IoT devices on their LEO satellite network.

Service Plans for Satellite Devices

Globalstar offers various service plans for their satellite devices, including options for custom messages, SOS, check-in messages, predefined messages, and tracking intervals.

Product catalogue

GLOBALSTAR (C-3 NEXT-GEN)
SmartOne Solar Industrial Asset Tracker

Solar-powered, intrinsically-safe industrial asset tracker certified for hazardous environments — up to 10 years maintenance-free operation, ATEX Zone 0, IP68/69K.

Dimensions	8.26 x 17.78 x 2.86 cm
Weight	385 g (1150 g with mounting bracket)
Operating temperature	-40°C to +65°C
Input voltage	10-48 VDC
Battery	Built-in rechargeable NiMH (non-replaceable)
Certifications	ATEX/IECEX II 1 G,E, FCC, CE, and multiple regional approvals

\$350

GLOBALSTAR (C-3 NEXT-GEN)
SPOT X Two-Way Satellite Messenger

Two-way satellite messenger with Bluetooth connectivity for off-grid communication and SOS — full QWERTY keyboard, MIL-STD-810G rated, IP67, \$249.99.

Dimensions	16.61 x 7.37 x 2.39 cm
Weight	198.4 g with lithium batteries
Operating temperature	-20°C to 60°C
Operating altitude	-100 m to 6,500 m
Impact resistance	MIL-STD-810G
Ingress protection	IP67 (submersible to 1m for 30 min)
Bluetooth range	Up to 30 ft

\$249.99

GLOBALSTAR (C-3 NEXT-GEN)
STX3 OEM Satellite Modem

Surface-mountable low-power OEM satellite modem for embedded asset tracking and telemetry — 12 µA standby current, coin-sized footprint.

Size	28.70 x 20.57 mm
Overall thickness (incl. components/shields)	4.13 mm
Standby current	12 µA
Certifications	FCC CFR Part 25 Modular, Industry Canada, CE Tested
