Hello Space

Hello Space is a Turkish satellite IoT company and LoRa Alliance member developing cost-efficient PocketQube satellite constellations to deliver global IoT data services. The company's mission is to bridge the connectivity gap across the 80% of Earth's surface not covered by terrestrial networks, using the world's smallest standard satellite platform — the 5×5×5 cm PocketQube — to provide affordable LoRaWAN narrowband communications from approximately 500 km altitude in LEO. Hello Space launched its first satellite, Istanbul, on a SpaceX Falcon 9 rideshare mission in May 2023, validating the platform's IoT gateway capability and LoRaWAN reception from orbit. The company's data service targets six vertical markets: maritime (cargo, fishing vessels, ocean sensors), energy (pipeline integrity, power lines, smart meters), environment (air and soil quality, disaster warning), manufacturing (mining and construction asset tracking), logistics (parcel, container, cold chain, fleet tracking), and agriculture (soil sensors, livestock, greenhouse, irrigation). Headquartered in Istanbul, Turkey, Hello Space positions itself as a data-as-a-service provider rather than a hardware-only satellite company, offering a complete pipeline from satellite IoT sensors through space segment to customer dashboards.

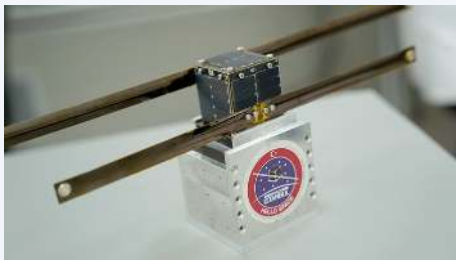

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES

Services

Agriculture & Livestock IoT Solutions Hello Space provides comprehensive IoT solutions for agriculture and livestock, offering 100% coverage for data processing and analysis from sensors.	Data Communication Problem Solving Hello Space helps customers solve their data communication problems by understanding their needs and offering suitable data services.
Energy Infrastructure Monitoring Hello Space offers transformative IoT data services for energy infrastructure monitoring, integrating satellite technology with terrestrial sensors for efficiency and cost-effectiveness.	IoT Connectivity Hello Space provides IoT connectivity services using its pocketcube satellite constellation, enabling data communication for various industries globally.
Maritime IoT Solutions Hello Space offers advanced satellite IoT solutions for maritime transportation, enabling real-time monitoring of assets like cargo ships, fishing boats, and containers.	

Product catalogue

HELLO SPACE

Hello Space Istanbul PocketQube Satellite

LoRaWAN IoT nanosatellite (5×5×5 cm PocketQube) launched on SpaceX Falcon 9 in May 2023 — provides global narrowband IoT data relay from ~500 km LEO across maritime, energy, agricu

Form factor	PocketQube (5 × 5 × 5 cm)
Orbit	LEO, ~500 km altitude
Communication protocol	LoRaWAN (narrowband IoT)
Launch	SpaceX Falcon 9 rideshare, May 2023
Alliance membership	LoRa Alliance member
Coverage	Global
Vertical markets	Maritime, energy, environment, manufacturing, logistics, agriculture
