Kacific Broadband Satellites

Kacific Broadband Satellites provides high-quality, low-cost satellite broadband. The company utilizes proven space technologies to deliver broadband internet to remote and underserved regions. Its services are accessible from small, easy-to-install, and affordable antennas. Kacific focuses on broadband and invests in powerful satellites for this purpose. The company serves a market that includes businesses, governments, ISPs, telecom operators, and enterprises, particularly in South East Asia and the Pacific region. Kacific's mission is to drive connectivity into new territories, covering 25 countries and utilizing 56 satellite spot beams. The company aims to enable critical government services and economic growth in rural and extra-urban areas.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES
