Nanosatellite Missions Design

Nanosatellite Missions Design (NMD) is Cameroon's first SpaceTech company, specializing in nanosatellite design and the development of space missions. The company designs satellites and space missions tailored to local needs, focusing on Earth observation data gathering and object tracking. NMD provides satellite-based IoT technology to enable objects to stay connected beyond internet coverage, suitable for applications in agriculture, infrastructure, and smart cities. They offer local access to Earth observation data, including high-resolution imagery, AIS, and weather data, in real-time. NMD's services include extending IoT capabilities via satellite using LoRa technology for remote areas without internet. The company also provides space mission training and satellite design training to increase Africa's technological independence. Their customers include governments and businesses, as well as operators seeking to extend coverage in rural areas. NMD collaborates with universities and research centers for training. The company is headquartered in Cameroon. The CEO is Dr. Tadadjeu, the CTO is Karol Konarski, the Accountant is Stephanie MALELE NONO, and the Business Development Director is Lambout Lemano Isnardon Lewis. The company was copyrighted in 2024.

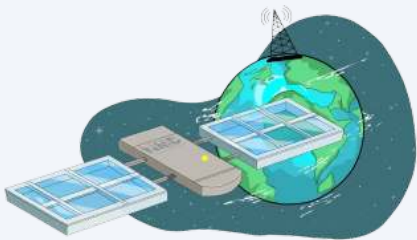

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES

Services

Satellite and Space Mission Design Custom solutions for designing and launching space missions tailored to specific objectives, with expert guidance through planning and satellite design.	Satellite Data service Provides access to high-resolution images, AIS data, weather information, and connectivity data through a secure, user-friendly platform for various sectors.
Satellite-enabled IoT Connectivity Enables consistent communication and data transmission for IoT devices in remote or challenging environments using satellite technology.	specialized training Offers tailored training to help customers master space mission design and satellite technology, empowering local expertise.
