as of 27 August 2026

A large, faint, dark gray circular graphic is positioned on the right side of the page. It consists of a central circle surrounded by two concentric arcs, creating a stylized 'C' or 'E' shape.

OHB Sweden AB

OHB Sweden builds small satellites, AOCS and propulsion systems. It is a provider of complete space missions, satellites, and spacecraft subsystems.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

PRODUCTS

Product catalogue

OHB SWEDEN AB

1-20N Monopropellant System

OHB Sweden's propulsion team has developed hydrazine-based systems for European primes, offering expertise across various thrust levels and suitable products.

OHB SWEDEN AB

10N Bipropellant System

OHB Sweden AB offers a 10N Bipropellant System, supported by extensive analysis capabilities and test facilities for calibration and campaign support.

[price on request](#) [datasheet](#)

OHB SWEDEN AB

AOCS and GNC Subsystem Development

OHB Sweden develops satellite guidance, navigation and control systems for innovative space projects, offering world-leading technological capabilities within AOCS.

[price on request](#) [datasheet](#)

OHB SWEDEN AB

Arctic Weather Satellite

The Arctic Weather Satellite (AWS) is the third mission to utilize the InnoSat platform, providing global atmospheric measurements for Numerical Weather Prediction, Nowcasting, and

OHB SWEDEN AB

Attitude and Orbit Control Systems (AOCS)

OHB Sweden develops satellite guidance, navigation and control systems for innovative space projects, committed to achieving the highest standards for successful space missions.

[price on request](#) [datasheet](#)

OHB SWEDEN AB

Cold Gas System

OHB Sweden AB provides cold gas systems using multiple gases, including miniature resistojets, with in-house characterisation and assembly services.

[price on request](#) [datasheet](#)

OHB SWEDEN AB

Electric Propulsion System

OHB Sweden AB offers Electric Propulsion Systems covering various technologies like FEEP, Grid, RF, and SPT, designed with flight heritage and tailored for mission needs.

OHB SWEDEN AB

EPSylon

EPSylon is an Electric Propulsion system for small satellites in a wide power and thrust range, serving both the institutional and commercial market.

Propellant	Xe
Power	250 W to 400 W per String
Supply voltage	28 V or 70 V
Thrust	8 mN to 18 mN
Specific impulse	950 s to 1390 s (Xe)
Total Impulse	Up to 250 kNs
Dry Mass	15-20 kg

[price on request](#) [datasheet](#)

OHB SWEDEN AB

InnoSat microsatellite platforms

The InnoSat platform offers a highly versatile and flexible platform service for a large range of space missions, both institutional and commercial.

Mass	50-300 kg
Power	<1,5 kW Solar Array, 1 kWh battery
Lifetime	3-7 years
Payload mass	20 to 150 kg
Payload power	up to 350 W
Supply voltage	28 V unregulated
Peak power	up to 1 kW

OHB SWEDEN AB

Propulsion Manufacturing, Assembly, Integration and Test

OHB Sweden AB offers comprehensive services for propulsion systems, including tube etching, bending, marking, welding, cleanliness verification, and accurate pre-assembly.

[price on request](#) [datasheet](#)

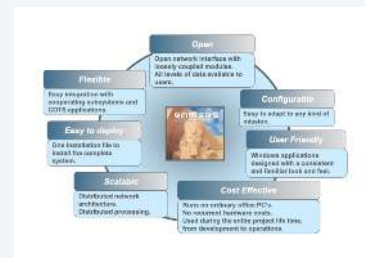

OHB SWEDEN AB

Propulsion Subsystem Design and Development

OHB Sweden offers comprehensive design and development services for propulsion subsystems, focusing on thorough layout modeling and tailored solutions.

[price on request](#) [datasheet](#)

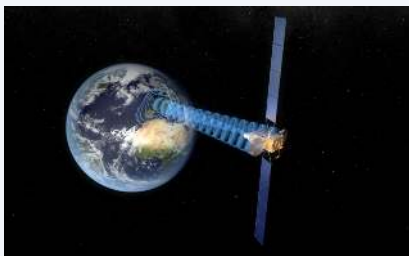

OHB SWEDEN AB

RAMSES

RAMSES (Rocket and Multi-Satellite EMCS Software) is a new generation monitor and control system software, developed based on over 30 years of experience in satellite and sounding

[price on request](#) [datasheet](#)

OHB SWEDEN AB

SMALL GEO - ELECTRA

Electra is an advanced electrically powered telecommunications satellite in the sub-three-ton weight class, designed to systematically broaden the scope for implementing electric p

[price on request](#) [datasheet](#)

OHB SWEDEN AB

Small Satellite Operations

OHB Sweden offers comprehensive small satellite operations, leveraging a strong heritage in designing, building, testing, and operating satellites from LEOP to deorbit.

[price on request](#) [datasheet](#)

[OHB SWEDEN AB](#)

Space Mission Design

OHB Sweden offers expertise and heritage in conducting all fields of space mission design, from LEO to interplanetary missions and small to large satellites.
