as of 25 August 2026

A large, faint, stylized graphic of an eye or a camera lens is positioned on the right side of the page. It consists of a central dark circle surrounded by concentric, slightly irregular arcs, giving it a mechanical or optical appearance.

Satoro

Satoro designs and manufactures modules and subsystems for small satellites, including custom-built satellite buses with flexible electrical and mechanical interfaces and intuitive flight software. The company provides services for assembly and integration, testing, and launch, aiming for accelerated launch timelines. Satoro also offers ground support and mission control software for data collection and rapid downlink. Their services include IOD/IOV, agile project management, launch contract and budget management, and dedicated mission management with global ground station support. Satoro's customers include academic institutions, as indicated by their upcoming missions. They have planned missions in Q1/2025 (3Ux2 units), Q2/2025 (3U unit), Q4/2025 (6Ux2 units), and Q1/2026 (6U unit), all for academic missions in Sun-Synchronous Orbit (SSO).

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES

Services

Consulting services

Satoro offers on-demand consulting services to help customers identify suitable services and products for their space missions.

Environmental Testing: Vibration, Shock, Thermal Vacuum

Satoro offers comprehensive environmental testing services, including vibration, shock, resonance survey, vacuum thermal cycle, and radiation tests, to ensure launch readiness.

Payload Integration

Satoro offers payload integration services, including interface management, to seamlessly integrate customer systems into their satellite buses.
