Shaanxi NewStar Communications

Shaanxi NewStar Communications, established in 2008, designs and manufactures satellite communication antennas. The company provides microwave wireless converged communication network solutions, which include R&D, production supply, system integration, installation, commissioning, training, and operational services. Their products and services cater to Internet Service Providers (ISPs), broadcasters, satellite network operators, and system integrators. NewStar operates as a fully licensed manufacturer and service provider in China, serving markets such as Satellite Communications, Defence, Government, Enterprise, Broadcast, and Internet. They have an in-house Research & Development department and their own factory. The company offers OEM customized services and provides a range of support services including warranty, repair or replacement, critical part management, planning, site surveys, technical support, installation and debugging, optimization, document management, reporting, certification, knowledge transfer, online guiding, and transportation. Their production process involves stretching, cutting, punching, welding, zinc soaking, paint powder coating, and packing.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES

Services

Operational Services

Newstar provides ongoing operational services for microwave wireless converged communication networks and satellite communication antenna systems.

Operator Training for Satellite Networks

Newstar offers training services for its microwave wireless converged communication network solutions, including satellite communication antenna systems.

Satellite and Microwave Network Commissioning

Newstar provides commissioning services to ensure microwave wireless converged communication networks, including satellite communication antenna systems, are fully operational.

Satellite Communication Network Installation

Newstar provides installation services for microwave wireless converged communication networks, including satellite communication antenna systems.

System Integration

Newstar provides system integration services for microwave wireless converged communication networks, including satellite communication antenna systems.

Product catalogue

SHAANXI NEWSTAR COMMUNICATIONS

Vast Parabolic Satellite Antenna

High-performance parabolic dish antennas for satellite communications ground stations, manufactured by Shaanxi NewStar in China.

Types	Parabolic dish antennas, ground station equipment
Bands	Ka, Ku, C, X
Applications	Earth station, satellite communications
