SpacePNT

SpacePNT SA is a GNSS receiver maker for the New Space satellite market. They deliver decimetre-level positioning and timing accuracy for single satellites and LEO constellations and highest signal reception sensitivity for Moon missions.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

PRODUCTS

Product catalogue

SPACEPNT
In-orbit servicing / space debris removal

SpacePNT's NAVILEO spaceborne receiver technology enables real-time autonomous orbit determination for collision avoidance, in-orbit servicing, and space debris removal.

Precision <10 cm (3D rms)

price on request

SPACEPNT
NaviGEO

NaviGEO is SpacePNT's high performance solution for launcher upper stages and in-orbit servicing vehicles, offering optimal GNSS visibility from LEO to GEO.

price on request

SPACEPNT
NaviLEO

NaviLEO is a high-performance GNSS receiver platform developed by SpacePNT, designed to meet the stringent needs and challenges of the New Space market.

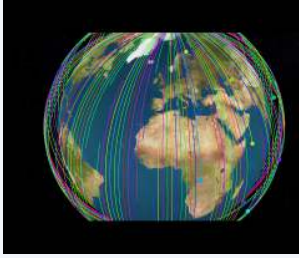

price on request

SPACEPNT
NaviMoon

NaviMoon is SpacePNT's advanced autonomous GNSS receiver solution, delivering sub-100m accuracy at Moon distance and reducing reliance on costly Earth infrastructure for Orbit Dete
