UNSW Canberra Space

UNSW Canberra Space, home of the Australian Centre for Space Engineering Research (ACSER), is a leading Australian university space research group. The centre developed Australia's first CubeSat (UNSW-EC0) and has since produced the M2 series of nanosatellites. ACSER focuses on space situational awareness, satellite communications, and small satellite technology for defence and civilian applications.

This profile is generated from the live NewSpace Market catalogue. Specifications are as published by the manufacturer; every product links to a page where a request for quotation reaches the company directly.

SERVICES

Services

ADF Joint Professional Military Education Program Support

UNSW Canberra supports the Australian Defence Force's Joint Professional Military Education program, enhancing the professional development of military personnel.

Defence Partnerships for Security

The institution engages in crucial defence partnerships to protect the security and safety of Australia and its allies.
